SUMMARY

Skilled React and React Native Developer with 3+ years of experience in designing and developing dynamic, high-performance web and mobile applications. Expertise in JavaScript (ES6+), modern front-end frameworks, and mobile-first development. Proven track record of delivering scalable, maintainable, and well-architected solutions using React.js and React Native. Adept at integrating RESTful APIs, managing state using Redux, and optimizing application performance for seamless user experiences. Strong problem-solving abilities, attention to detail, and a commitment to delivering clean, efficient code. Collaborative team player with a passion for continuous learning and staying ahead of emerging technologies.

WORK EXPERIENCE

Affy Cloud IT Solutions
Frontend Developer

Aug 2023 - Present

Crypto Technocraft Private Limited
Frontend Developer , Intern

Jan 2022 - Aug 2023

ROLES & RESPONSIBILITIES

- Developed and maintained reusable, modular components in React and React Native to accelerate development and ensure scalability .
- Implemented navigation and complex UI animations in React Native using libraries such as React Navigation and Reanimated, ensuring smooth transitions and an intuitive user experience across mobile platforms.
- Optimized application performance using Redux for state management and integrated APIs for data-driven components.
- Collaborated with cross-functional teams during the agile development process, actively participating in sprint planning, daily stand-ups, and retrospective meetings.
- Collaborated with designers, backend developers, and product managers to translate business requirements into functional front-end solutions, adhering to best practices and industry standards.
- Integrated native modules in React Native for enhanced functionality, including camera, location services, and push notifications, while ensuring optimal performance across iOS and Android platforms.
- Developed and maintained scalable, modular, and reusable code components to streamline the development process .
- Enhanced app performance and load times by implementing lazy loading, code splitting, and optimizing bundle size in React and React Native applications, improving user engagement and retention.
- Utilized Expo CLI to streamline the development and testing process in React Native, ensuring rapid iteration and seamless deployment across platforms.

- Successfully integrated RESTful APIs into Ionic applications, enhancing communication efficiency with backend services.
 - Optimized cross-platform applications by leveraging React Native's hot-reloading and Expo's development tools, significantly reducing debugging time and accelerating the deployment cycle .
 - Developed interactive web applications using React with Redux, emphasizing user-friendly interfaces and optimal performance
-

TECHNICAL SKILLS

- **React , React Native , Typescript , Javascript , HTML / CSS , Redux , Bootstrap**
 - **Tailwind , API Implementation , Git , GitHub**
-

RELEVANT PROJECTS

• ELEGANZA ESTATE SOLUTIONS

- Eleganza Estate Solutions is a cross-platform real estate management app developed with React Native, offering smooth performance on both iOS and Android. It allows users to search and filter properties by price, type, location, and amenities. Users can save favorite properties with the wishlist feature and explore them through real-time 3D visualization. Admins can manage property listings, view and respond to leads, and update property data. The app ensures secure authentication and integrates APIs for efficient data management across user profiles, property listings, and lead generation .
- Administrators can manage property listings, update details, and monitor leads through an integrated lead generation system .
- The app includes a wishlist feature for easy tracking of favorite properties and offers real-time 3D models for enhanced viewing .

• ScrapitUp

- ScrapitUp is an innovative platform designed to simplify the process of selling scrap materials . Users can easily list their scrap items for sale, connecting them with interested buyers or recycling centers. The platform ensures a seamless experience for both parties, promoting sustainable practices and efficient waste management .
 - Designed an intuitive interface for easy scrap selling.
 - Added location and material-based filters for quick results.
 - Developed a backend to securely store user and listing data.
 - Ensured compatibility on both mobile and desktop.
 - Enabled instant notifications for offers and inquiries.

- **Renewal Notification reminder**

- Developed a Renewal Notification Reminder system designed to streamline subscription management for businesses. The system allows employees to add and manage customer subscriptions, ensuring efficient tracking of expiry dates. Automated notifications are sent to customers one month before their subscription expiry, prompting timely renewals. Additionally, admins can create and manage employee accounts, with role-based access control ensuring secure and organized management .

- **E-com Al Fatir**

- Developed a professional E-commerce platform for Al Fatir, focusing on premium attars and perfumes, with features like user authentication, product browsing, cart management, and secure payment integration .
 - **User Authentication** : Built a secure and robust authentication system, including user registration, login, and session management, ensuring data integrity and user privacy .
 - **Product Showcase** : Created an organized and visually appealing product catalog that categorizes a wide range of attars and perfumes, making it easy for users to explore products based on preferences.
 - **Add to Cart Functionality** : Developed a comprehensive cart system allowing users to add , remove, and modify product quantities with real-time price updates, ensuring experience .
 - **Payment Gateway Integration** : Integrated a secure and user-friendly payment system (e.g., Razorpay) to enable fast and safe online transactions with multiple payment options like cards, UPI, and wallets .
